

## Southern Railway "coach" for Schools And JNR Rolling stocks

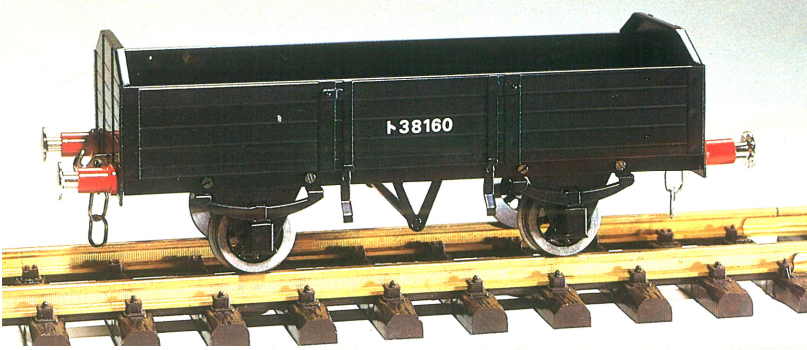

This is a Southern Railway-type Mark One coach, produced by ASTERHOBBY to coincide with the production of SR Schools. However, due to a lack of information at the time, the number of windows, length and configurations were far from the actual ones. Nevertheless, it was offered to the market at a low price and performed well as a towing vehicle, so a considerable number were released.

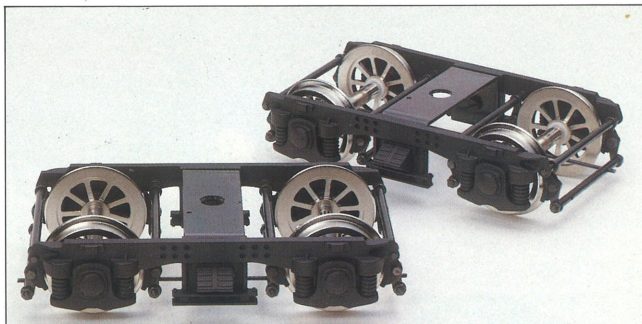

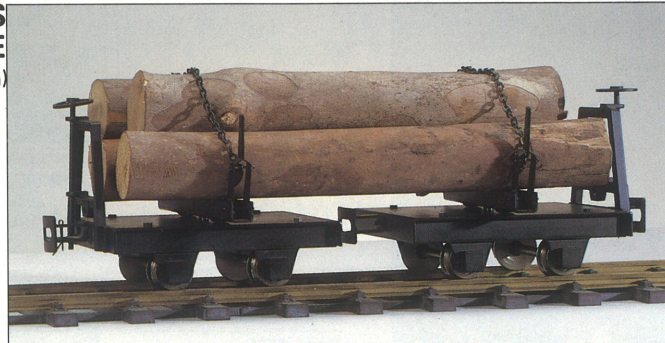

**LOG CAR**
